EDUCATION

Bachelors of Science in Information Technology
Georgia Gwinnett College | Lawrenceville, Georgia

August 2021 - Current

- Relevant Coursework: Advanced Programming (Data Structures), Software Development, Advanced Databases, and Testing/QA
- Coding Language: Java, Python, SQL, JavaScript, HTML, CSS, Bash, R, PHP

PROJECTS

Motion Flow, Fitness Tracker App:

- Helped create a fitness tracking mobile application in which users are able to track steps, calories, and distance
- The app includes a calendar for tracking workouts on different days, log in/log out system for user accounts, tracking system to track the steps using the phone's built in step tracking system, and multiple progress bars set for goals set by individual users

Order 66 Discord Bot:

- Worked with two clients outside of the school to create a Discord Bot, using JavaScript and MongoDB, that kicks inactive users from a Discord Server
- The two clients are both Software Engineers and have given my team requirements for the bot

ViZDoom AI Reinforcement Learning Project:

- Built an AI model using ViZDoom source and Python language to train an AI to play the game "Doom" and learn from each level using reinforcement learning algorithms.

EXPERIENCE
